

[For sale:](#)

[B&G 4G Radar](#), used in good condition!

I replaced my [B&G 4G Radar](#) with by a B&G Halo+ 20, because it gave an error message, "no scanner". After I took the B&G 4G down from the middle of the mast, I took off the cover and found the OEM orange o-ring drive belt that turns the scanner was broken (see pictures). I tried to purchase an o-ring drive from B&G but it was not available. So, I found a substitute from O-Ring.com. I have included a spare o-ring belt as they come in 2 packs. (see picture of complete specs). I am sure the unit works just fine, if not you can return it.

Can be controlled by all [Navico](#) plotters (B&G, [Simrad](#), Lowrance) since the Z8/T8 series (so also Zeus2, Zeus3, Vulcan, etc.).

Includes a new [radar](#) cable.

Broadband 4G™ Radar provides a crystal clear image from the bow of your boat with up to 36nm range. This low power solid state technology offers unrivalled close-range target discrimination while InstantOn™ provides zero warm up time

#### Key Features

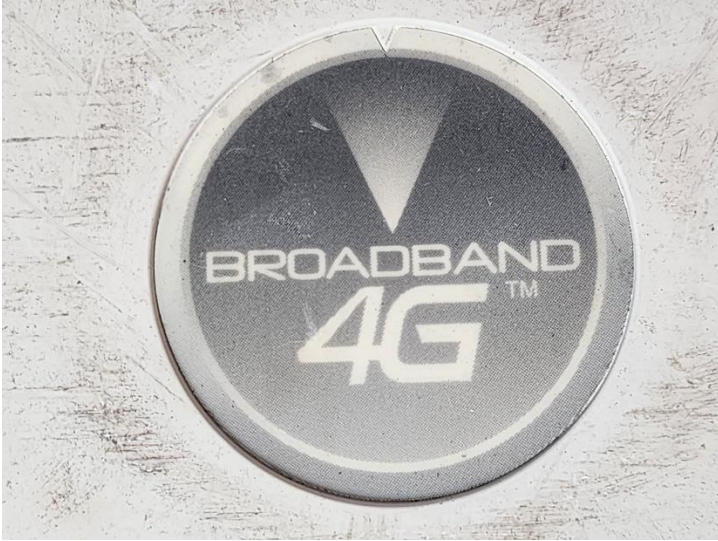

- 36nm Working Range
